

LIST OF POSTERS

ID	Title	Author	Area
S01-011	Variations in rheological properties by melt reactive modification of PET	S. Dolatshah	A
S01-020	Effect of surface modification on thermal properties of paraffin/copper oxide nanocomposite	Khonakdar, Hossein Ali	A
S01-054	In situ ring-opening polymerization of lauro lactam in presence of MWCNT toward Polyamide 12/MWCNT-nanocomposites	F. Faridirad	A
S01-083	Recycling cast polyamide 6 using a lubricant	Formisano, Benjamino	A
S01-188	Saw dust reinforced toughened polypropylene (PP/EPDM/talc): effect of plasticizer incorporation	Bonse, Baltus	A
S01-206	A study on the optimization of thermal conductivity of HDPE using micro- and nanoscale fillers	Stieger, Sebastian	A
S01-261	Influence of modified and unmodified rice husk on mechanical properties of poly(lactic acid)	Khodabakhshi, Khosrow	A
S01-297	Rheological and mechanical behavior of polyethylene filled with Estonian oil shale heat carrier retorting waste ash	Suld, Tiia-Maaja	A
S01-405	Cross-linked polyethylene (XLPE) as filler in high-density polyethylene: Effect of content and particle size	Bonse, Baltus	A
S01-410	Synthesis of MMA/GMA graft and random copolymers by melt and solution copolymerization	Garmabi, Hamid	A
S01-421	Analysis of dynamic oscillatory rheological properties of PP/EVA/organo-modified LDH ternary hybrids based on generalized Newtonian fluid and generalized linear viscoelastic approaches	Khonakdar, Hossein Ali	A
S01-423	Thermal and dynamic mechanical properties of PP/EVA nanocomposites containing organo-modified layered double hydroxides	Khonakdar, Hossein Ali	A
S02-068	The usage of octaisobutyl-POSS in the blends of PLA/PBAT: "Effects of molecular weight of PBAT"	Can, Buse	D
S02-069	Effects of different toughens on the properties of poly(lactic acid)	Can, Buse	D
S02-072	Thermal and thermo-mechanical properties of PLA/TPU/Epoxy-POSS ternary blends	Tuccar Kilic, Nilay	D
S02-073	Immiscible PLA/PBAT blends and partially miscible PLA/TPU blends: "Comparison of the effects of O-POSS on thermal and thermo-mechanical properties"	Tuccar Kilic, Nilay	D
S02-258	Recycled polycarbonate as impact modifier in polypropylene	Bonse, Baltus	D
S02-330	Morphology, crystallization kinetics in ternary polymer blends: Evaluating the influence of surface functionalized carbon nanotubes	Kar, Goutam	D
S02-356	Enhanced thermal conductivity of polymer composites filled with hybrid fillers	Mehranpour, Milad	D
S02-358	Nanoparticle partitioning of MWCNTs filled PC/PVDF co-continuous blends by rheological characterization	Javadi, Azizeh	D
S02-362	Investigation on the thermal stability and morphology of PLA/PCL/Starch ternary blends containing hydroxyapatite nanoparticles and triclosan	Khonakdar, Hossein Ali	D
S02-380	Structural and electrochemical properties of PEO/PAN/graphene nano-fibrous blends	Abdollahi, Serveh	D
S02-411	Improvement of rheological and mechanical properties of PLA by reactive blending with poly(MMA-g-GMA)	Karimi Amirhossein	D
S02-418	An investigation of linear viscoelastic behavior of PP/EVA/LDH nanocomposites by using dynamic mechanical analysis and creep test	Maryam, Otadi; Vahabodin, Goodarzi	D
S03-136	Using the cone partitioned plate geometry for enhanced material characterization of polymer melts	Reim, Viktor	C
S03-150	Modeling the flow of Non-Newtonian fluids in single-screw extruders	Marschik, Christian	C
S03-151	Shear stress growth phenomena of amorphous polymer in low shear rate region	Yamasaki, Natsumi	C
S03-239	Surface treatment of cellulose nanocrystals (CNC) - effects on dispersion rheology	Forsgren, Lilian	C
S03-245	Optimization for starve fed/flood fed single screw extrusion	Nastaj, Andrzej	C
S03-260	Full characterization of multi-phase, multi-morphological kinetics in flow-induced crystallization of iPP at elevated pressure	Peters, Gerrit	C
S03-268	Effect of thermal history on crystallization behavior of polyethylenes in high-speed DSC measurements	Takarada, Wataru	C
S03-281	LCB formation in PLA by reactive extrusion	Kaschta, Joachim	C
S03-291	Structure development in molten conductive polymer composites studied by electrical-rheological measurements	Stary, Zdenek	C
S03-327	Influence of talc properties on processability, rheological behaviour and crystallinity of PP based automotive compounds	Yildiz, Ramazan	C
S04-005	Friction and wear properties of recycled natural fiber reinforced plant-derived polyamide1010 biomass composites	Nishitani, Yosuke	D
S04-023	Use of natural polymers extracted from agroindustrial residues of Agave tequilana Weber var. azul in the synthesis of silver nanoparticles and their antibacterial activity	López-Naranjo, Edgar	D
S04-028	Effect of modified montmorillonite in the flexural and tensile properties of polylactic acid nanocomposites	Perez-Fonseca, Aida	D
S04-053	Microencapsulation of melamine polyphosphate and its flame retardance in polyurethane composites	Chiang, Chin-lung	D
S04-062	Thermal cycling effect on mechanical properties of multiwalled carbon nanotubes reinforced epoxy/carbon fiber composite laminates	Shen, Ming-Yuan	D
S04-070	Study of modified LDHs as UV protecting materials for Polypropylene (PP)	Naseem, Sajid	D

LIST OF POSTERS

S04-095	Effect of phosphorus-containing modified magnesium hydroxide on the mechanical properties and flammability of PLA/MH composites	Zhao, Pengcheng	D
S04-248	Preparation and properties of antimicrobial PLA/PEG/nano Ag nanocomposites	Javadi, Azizeh	D
S04-267	The effect of nanosilica on rheology, crystallinity and mechanical properties of high density polyethylene (HDPE), ethylene, 1-octene copolymer (EOC) and their blends	Javadi, Azizeh	D
S04-269	Preparation and characterization of polyimide reinforced carbon fiber composites by vacuum assisted resin infusion	Park, No-hyung	D
S04-293	Mechanochemical synthesis of layered double hydroxide materials	Bester, Keagan	D
S04-294	Parameters affecting the dissolution-precipitation synthesis of katoite and hydrocalumite	Gevers, Bianca	D
S04-346	Assessment of poly(lactic acid) crystallization behavior in the presence of a plasticizer and nanoparticles	Khonakdar, Hossein Ali	D
S04-387	Preparation, mechanical properties and moisture absorption of urethane acrylate resin/clay nanocomposites	Esfandeh, Masoud; Khonakdar Hossein Ali	D
S04-415	Polyamide GnP nanocomposites for permeation control	Trampe, Markus; Leuteritz, Andreas	D
S04-440	On the effect of using a hybrid of nanoparticles containing clay and CaCO ₃ on the viscoelastic response of PP/EVA blends	Khonakdar, Hossein Ali	D
S04-471	Electrical conductivities of melt spun PMMA/aligned carbon fibers/carbon black fiber composites	Qu, Muchao	D
S04-472	Simulating the electric conductivity of the conductive polymer composites	Yang, Guanda	D
S04-474	Modelling the effects and interactions of a layered double hydroxide in a flexible PVC formulation	Fechter, Reinhard	D
S05-027	Effect of co-plasticizer type on properties of edible starch films	Ozkoc, Semin	A
S05-130	Influence of raw material properties on swelling and spinning stability of ultra-high molecular weight polyethylene monofilaments	Yan, Yurong	A
S05-133	Preparation of intelligence antibacterial films based on low density polyethylene and evaluation of its properties	Mehranpour, Milad	A
S05-164	Development of a model for the mechanical behaviour of polypropylene nonwovens for different test directions and strain rates	Leucker, Karsten	A
S05-184	Performance of jute/PLA all-biodegradable overmolded eco-composites	Güralp Özkoç	A
S05-337	Novel flame-retardant polymer bead foams	Gensel, Julia	A
S05-389	Novel method to measure surface crystallinity of fibers and nonwovens	Lanyi, Franz	A
S05-390	A comprehensive study on the properties of polypropylene fibers and nonwovens in dependence of processing and storing conditions	Lanyi, Franz	A
S05-420	Thermoelectric properties of PEDOT:PSS modified with vitamin C	Gnanaseelan, Minoj	A
S05-441	Precursor fibers from lignin-polyacrylonitrile blends regenerated from chloride based ionic liquid solutions	Al Aiti, Muhannad	A
S06-047	Morphology-property behavior of semi-crystalline polymers in injection molded parts	Spörer, Yvonne	A
S06-063	Highly filled suspensions with zirconia powders: Assessment and control of the surface chemistry	Auscher, Marie-Camille	A
S06-110	Extrusion-ultrasound on polyethylene terephthalate and polycarbonate composite from recycled materials	Sanchez-Solis, Antonio	A
S06-168	Investigation of the melt quality of a wave screw in a grooved plasticizing zone with a high specific throughput rate	Thieleke, Philipp	A
S06-179	Influence of processing parameters on the morphology of co-injected foamed parts	Altstaedt, Volker	A
S06-202	Experimental analysis of conformal cooling in SLM produced injection moulds: Effects on process and product quality	Evens, Tim	A
S06-254	Influence of reprocessing on the mechanical and thermal properties of polypropylene	Catelli, Adriana	A
S06-413	Hygrothermal aging and effect of corrosion in polymer-metal joints	Kuehnert, Ines	A
S06-481	Processing of poly(propylene carbonate)	Kuehnert, Ines	A
S07-129	Nano silica from rice husk: How to solve an environmental problem through SBR	Raimonda, Pablo	C
S07-201	Two-component injection moulding of thermoplastics with thermoset rubbers: The effect of the mould temperature distribution	Bex, Gert-Jan	C
S07-211	Application of functional magnesium-based nanomaterials in room temperature vulcanized silicon rubber composite	Lijuan Li and Feng Nie	C
S07-243	Evaluation of the influence of crosslink density and penetrant size on the diffusion properties of silicone oils into silicone elastomers	Daenicke, Jonas	C
S07-316	The synthesis and characterization of silane coupling agents to increase silica filler content in styrene-butadiene rubber wet master batch for all-season automobile tires	Choi, Jun	C
S08-016	Effect of functionalization on the thermal conductivity of multilayer graphene nanocomposites	Tsai, Jia-Lin	B
S08-030	Monitoring polymer diffusivity in nanocomposites by NMR	Nadiv, Roey	B
S08-065	Rate effects in thermogravimetric analysis of carbon nanotubes	Grady, Brian	B
S08-108	Polypropylene nano-graphite composites obtained by an ultrasound technique and melt extrusion	Manero, Octavio	B
S08-115	Synergetic effect of carbon nanotubes and graphene nanoplatelets on the fatigue crack growth rate of epoxy composites	Jen, Yi-Ming	B
S08-120	Evaluation of the fracture resistance of epoxy-carbon nano-composites	Naguib, Hani	B

LIST OF POSTERS

S08-156	Highly filled PP/graphite composites: Study of electrical and thermal conductivity as well as adhesive joining	Rzeczkowski, Piotr	B
S08-157	Synergistic effects of graphite mixtures with different particle sizes and morphology on the electrical and thermal conductivity of highly filled polypropylene composites	Rzeczkowski, Piotr	B
S08-282	Nanofilled epoxy adhesives: Optimization of the rheological properties of the nanofilled formulations	Nobile, Maria	B
S08-287	Compatibilizing of PP/NBR immiscible blend using modified nano graphene oxide	Hamid, Khodabakhshi; Fatemeh, Goharpey	B
S08-296	The influence of graphene nanoplatelets on mechanical and shape memory properties of thermoplastic polyurethane/ acrylonitrile butadiene styrene nanocomposites	Memarian, Farzaneh	B
S08-301	Hybrid nanocomposite as strain sensor on the base of SBS/CNT/RGO	Samira, Haghshenas; Saeed, Bazgir	B
S08-304	The relationship between microstructure and the vapor sensing behaviors of multi-walled carbon nanotubes filled polycarbonate/polystyrene blends	Pötschke, Petra	B
S08-311	Comparative study of electrical percolation of single-, multiwalled and branched carbon nanotubes melt mixed in different thermoplastic matrices	Pötschke, Petra	B
S08-312	Melt mixed composites of polypropylene with single walled carbon nanotubes for thermoelectric applications: switching from p- to n-type behavior by additive addition	Pötschke, Petra	B
S08-331	High performance electromagnetic wave absorber derived from multi layered assembly of PC/PVDF blends containing different functional conducting and magnetic nanomaterials	Biswas, Sourav	B
S08-352	Influence of a supplemental filler in twin-screw extruded PP/CNT composites using masterbatch dilution	Müller, Michael	B
S08-370	Bipolymer-carbon nanotube composites	Elias, Anastasia	B
S08-379	Electrical conductivity of PVDF composites melt mixed with MWCNTs having different morphologies	Kunz, Karina	B
S08-388	Melt compounding of poly(lactic acid) with carbon-based fillers: effect on crystallization kinetics	De Santis, Felice	B
S08-432	Low percolation thresholds of electrical conductivity and rheology in PC/SAN/MWCNT nanocomposites	Bizhani, Hasti	B
S08-469	Universal control of pyro-resistive behaviour for flexible self-regulating heating devices	Porwal, Harshit	B
S09-465	Radiation cross-linking technology for extruded products	Rouif, Sophie	B
S10-145	Polyethylene plating by using the function of side chain crystalline block copolymer	Uchino, Tomonori	D
S10-146	The polymerization of the side chain crystalline block copolymer and the study of super hydration	Fukaya, Koki	D
S10-189	Investigating the effect of surface energy of chitosan/titanium dioxide nanocomposite films on their antibacterial behavior	Khonakdar, Hossein Ali	D
S10-191	Polyethylene surface modification ability of side chain crystalline polymer and side chain crystalline block copolymer.	Miho, Yuga	D
S10-257	An Investigation of morphology and chemical composition of water-repellent films based on poly(dimethylsiloxane)/titanium dioxide nanocomposites	Bolvardi, Beleta	D
S10-259	Influence of processing method and parameters on the quality of composite films of montmorillonite clay (MMT) and poly(vinyl alcohol) (PVA)	Shaw, Montgomery	D
S10-345	Assessment of the role of surface modification of nanosilica on the wetting behavior of thermoplastic polyurethane surfaces	Khonakdar, Hossein Ali	D
S10-409	Alignment of carbon nanoparticles in composites with electric fields	Morais, Manuel	D
S11-009	Non-destructive testing of 3D-hybrid components using air-coupled ultrasound	Essig, Wolfgang	A
S11-160	Cavitation and lamellae fragmentation-reconstruction of isotactic polypropylene during uniaxial drawing: The influence of annealing	Chang, Baobao	A
S12-422	Investigation and application of a graphene layer as particular susceptor in polymer hybrid materials	Silva, Cláudia	D
S13-221	Analysis of the spinning process and batch-to-batch consistency of aligned PCL/Collagen nanofibers for skeletal muscle	Dippold, Dirk	D
S13-226	Mechanical stress relaxation of medical tubing for infusion therapy: predicting product performance by material modelling	Kremser, Thomas	D
S13-427	Drug delivery in carboxymethylcellulose/graphene oxide/hydroxyapatite composites systems	Othman Khalifi Taghzouti	D
S13-429	Obtaining biodegradable, elastic electrospun polyurethane/graphene oxide grafts for tissue scaffolds	Ivanoska-Dacikj, Aleksandra	D
S14-050	Comparison of the mechanical properties of 3D printed polymers and TiAL6V4 used in medical applications	Weißmann, Volker	A
S14-333	Development of novel nanocarbon composites based on functionalised MWCNTs and poly lactic acid for fused deposition modeling applications	Parra, Julián	A
S14-401	Determination of the short time stability of polymers	Schawe, Juergen	A
